

# Baisangur Dudayev

## About Me

**I am currently studying for my bachelor degree in Cloud & Cyber security,** although I am more interested in the security side of IT. Choosing IT was a natural progression for me, fueled by an innate curiosity for technology's intricate workings and its potential to shape the future. Opting for Cyber Security was a deliberate decision, inspired by the profound impact this specialization has on securing digital ecosystems. I am currently staying in the Province of Antwerp
